

## Technical Information ■

Product : **Magic Clean**  
Date : **02 / 2015** (This document supercedes all older versions.)

### Description

Magic Clean is a highly effective dirt-etcher. For eradicating stubborn stains on CFK, Windows, rubber dinghys, fenders, metal, leather, tarpaulins, sails or in the household.

### Applications

- No cleaning agents needed
- Only pure water
- Easy to clean
- No Nanotech / No Microfiber

### Restrictions for applications

With sensitive surfaces (high gloss varnish, car paint) test first on an inconspicuous area to see whether scratches or dulling are caused. Not suitable for personal care.

Storage: Protect from direct sunlight.

### Pre-treatment and post-treatment

Lightly dampen the Magic Clean sponge. Rub the dirtied surface with the Magic Clean. Rinse out the Magic Clean well with clean water after the cleaning process and between any further cleaning operations.

Sometimes a light white film residue remains on the surface, simply rinse this off with water or a moist cloth.

One Magic Clean cleans a smooth surface of approx. 10 m<sup>2</sup>. The more rough a surface is, the more quickly the Magic Clean is used up. The Magic Clean etches dirt with his revolutionary surface, due to this he dispels by the time.

## Colours / Packaging

- 2. with grip - 2 Pads 20 cm x 12 cm x 3,5 cm
- 3. Refillpack - 3 Pads 20 cm x 12 cm x 3,5 cm
- 4. Sponge pack - 12 cm x 6,5 cm x 4 cm

## Certifications / Testing

None
